

DVD camcorder with 34X optical-zoom

Slick Memory Card Camcorder featuring powerful 42x Intelli-zoom lens brings the world closer without sacrificing image quality. Plus with H.264 codec you can easily share your memories on the internet and portable devices.

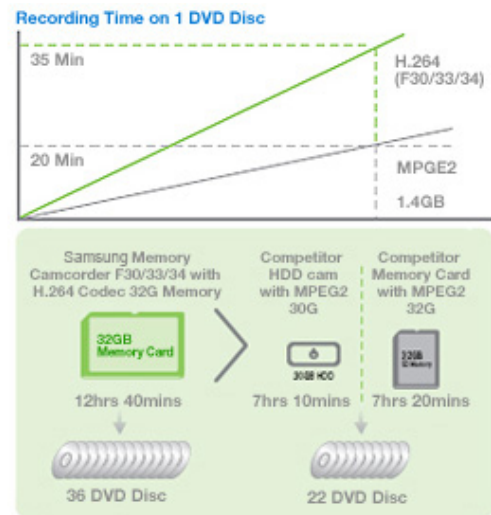

Face detection AF technology

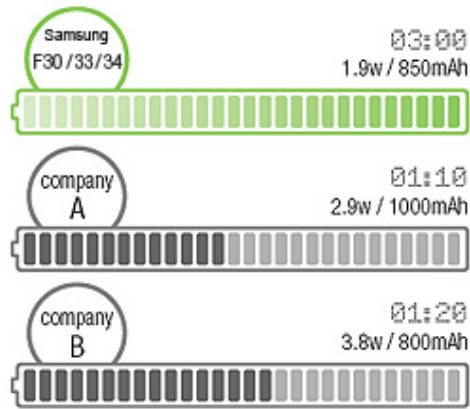

Unlike conventional camcorders, the F30's advanced Face Detection AF technology targets the faces in the screen. With intelligent face detection auto-focus, faces are always focused-on, even if they are not in the centre of the screen. Samsung's Face Detection AF enables you to capture clearer, higher quality video.

More recording time, more memories to treasure

Enjoy recording more of the highest quality video footage with the Samsung F30. Thanks to the high performing H.264 Codec, the F30 record more of your memories than camcorders which use MPEG2. With the same capacity, the F30 record about twice more than MPEG2 codec. Its compressed video files are faster to e-mail and upload to the web, which makes sharing as easy as can be, with no loss of Image quality.

Battery life that won't let you down

Enjoy recording more of the highest quality video footage with the Samsung F30. Thanks to the high performing H.264 Codec, the F30 record more of your memories than camcorders which use MPEG2. With the same capacity, the F30 record about twice more than MPEG2 codec. Its compressed video files are faster to e-mail and upload to the web, which makes sharing as easy as can be, with no loss of Image quality.

Full angle grip

The F30's multi-positional swivel hand grip offers full flexibility and freedom of movement for the full range of shooting positions. The innovative swivel grip allowing you to seamlessly move the camcorder between regular and low level positions, giving you complete control over how and what you shoot.

Share your memories, share your life

Sharing your life with friends and family becomes easier with the Samsung F30. By selecting the Web & Mobile mode, you can shoot in an H.264 that supports MP3 players and YouTube. The video files recorded by the Samsung F30 can easily be used with a transfer program and played on an H.264-supported MP3 player. The YouTube uploader in the Media show software bundle enables direct YouTube upload which bypasses the You Tube home site.
